

Lira Clinical Peels

To Renew & Refresh

Lira Clinical Peels are formulated using cutting edge quality ingredients to generate remarkable results. The different levels and solutions enable total customization for all skin types and conditions at various peel depths.

All peels listed here are for an in depth description of each Peel Solution Skin Fitness Studio has available. After your consultation, the Esthetician will then decide the proper resurfacing program for your ideal skin health to achieve optimal satisfaction.

Skin must be conditioned with Lira home care products prior to use, it's essential that skin is prepped at least 2 weeks prior to peels Level 2-4. Post treatment home care is also a mandatory part of all resurfacing programs.

We must heal the skin! Lira Clinical's Post/Travel kit is specifically designed for post-treatment and post-operative conditions to accelerate and enhance the healing phase. Plant-derived stem cells, potent antioxidants, healing minerals, and sun protection dramatically reduce the inflammatory process. It is essential to heal, protect, and soothe sensitized skin.

The average length of post care is determined by the depth of treatment and modality used:
Level 1 & 2: 3 to 5 days of post care
Level 3 & 4: 7 to 10 days of post care

Clients may continue their regular skin care routine when their skin is no longer flaking or peeling.
